SUMMARY

I am a Software Engineer who loves to work in a challenging work environment where I can utilize my expertise in technical skills, towards the development and implementation of the new ideas, contributing to growth of the organization and my carrier.

SKILLS

| REACT JS | NEXT JS | JAVASCRIPT | JAVA | MYSQL |

| SPRING BOOT | AWS | IOT | GIT | DEVOPS | MONGO DB |

PROFESSIONAL EXPERIENCE

5G-NSA

INFOVISION May 2021-Till Date

- It is a Migration project from JAVA to Spring Boot Microservice.
- The functionality of site includes Pause & Resume, New and Existing Customer flows, Personalization, Credit Score check, Payment Service.
- Client: Verizon
- Technology Stack: Java, Spring Boot, Redis
- **My Contribution:** I have contributed in bug fixes and also took complete ownership on Pause and Resume. I have also worked on the JUNIT.I also worked on the testing of D2D flows.

CST Batch Job

IVL March 2021–May 2021

- It is a migration project from Mainframe to Spring Boot Microservice and to send the jobs to the corresponding servers (East, West, North, B2B).
- Client: Verizon
- Technology Stack: Java, Spring Boot, Cassandra DB
- **My Contribution:** I have migrated more than 20 jobs from Cobol to Microservices with the help of above technology.

Chabot

IVL October 2020–March 2021 - Internship

- The project is mainly focussed on a chatbot service which uses the customer keyword from the chat
- Client: IVL
- Technology Stack: Python, Flask, HTML, CSS
- **My Contribution:** The entire chatbot is developed and tested by myself. This bot will be useful for a new joiner who wants to complete his onboarding. It was very helpful during the pandemic. [WFH & Virtual Onboarding]
